

RMS

Tracks

This model is design for the places that have variable illumination needs like exhibition areas, museums, shopwindows, etc. They provide a reliable and continuous light by means of its special aluminum body cooling design, with their elegant design and easy mounting, and also with soft white body colour, they can be used in every kind of areas. There are two ways for mounting. Rail resonance and anti-resonance. These two ways are both easy to work together.

RMS
